

# MUIR CONSULTING, Inc.

Land Surveying ♦ G. P. S. ♦ Planning

## EDUCATION

### Education

Muir Consulting, Inc. has always been committed to education. Our founder, Jack M. Smith, has a Bachelor of Science degree in Surveying Engineering and has also taught at the university level. Many of our team members possess degrees from institutions of higher learning. We encourage continuing education of all of our staff members. And, we actively participate in our community by donating our time to local elementary schools. It is only appropriate that Muir Consulting, Inc. is a leader in providing surveying services for educational facilities.

We understand the future belongs to our children. We encourage sustainable design and green technologies on all of the projects we are involved. It is important to not only educate our children, but ourselves.

### Services Provided

We have years of experience surveying elementary schools, junior high schools, high schools, junior colleges, universities, and administrative facilities. We have worked on new construction, ADA compliance, modernization of existing schools, sustainable development, and surveys for planning and facilities management. Muir Consulting, Inc. is prepared to provide all types of surveying services.
